Subject: Survey Plan for Watervliet Control No. 136080

Ms. Ullrich

Here is the revision for Room 255 at Watervliet. The changes are:

1. Revert back to the DCGL calculation in the initial submission
2. Follow survey plan as in 1st revision with appropriate count times for smaller probe area (the initial submission has a probe area of 126 cm² and it is actually 100 cm²)
3. The COMPASS calculation for the revised information requires 10 data collection locations for the MARSSIM survey. This changes the DCGL_{mc} and the required scan MDA to 228 dpm/100 cm².
4. Corrected the title to Table 4 in Attachment 1.

I hope you can look at this to see that it is reasonable and then I will have it sent with a proper authorization from Watervliet.
