Subject: License amendment			
<p>Summary:</p> <p>Mr. Mazzocco will fax a letter containing the close-out survey for the in vitro lab and a request to remove it from the license. In addition, he stated that a possession limit of 500 millicuries was more than adequate for their 35.300 materials. I also informed him that the users listed under 12.D. of their license would not be added to the next amendment. According to him, the AMP were added to this section of the license so that they could use sealed sources for calibrations. I informed him that, that was covered when we listed them as AMPs on their license.</p> <p>Mr. Mazzocco also stated that he was going to add a request to the letter for an additional radiologist.</p>
