

U.S. NUCLEAR REGULATORY COMMISSION		Conversation Date: 2-18-05	
TELEPHONE CONVERSATION RECORD		Time: 4 pm	
Mail Control or Report No.	License No.	Docket No.	
N/a	37-10599-01	030-03129	
Licensee/Applicant Participant(s):	Organization:	Telephone No.	
Donald F. Bittner, M.D., RSO	UPMC Northwest		
Person(s) Calling: Penny Lanzisera			
Subject: High Dosimetry Report			
<p>Summary:</p> <p>Dr. Bittner called to report the badge reading for a medical physicist of 30 rem to the whole body during the month of October 2004. After further discussion, it was determined that the medical physicist was involved with accelerator commissioning only during the time period and did not work with the high dose rate remote afterloader, brachytherapy, or radiopharmaceutical therapy. The physicist believes he may have left his badge in the accelerator room during part of the commissioning. I informed the licensee to call the Commonwealth of Pennsylvania. Dr. Bittner stated that James Angelo (sp?) with Pennsylvania had already been contacted and was following up on the report.</p>			
Action Required/Taken: Discussed with Deputy Division Director. File telcon.
