Subject: Re: License amendment and update

Tara,

The answers to your questions are as follows:

1. Dr. Alan Zabell, MD will supervise the use of Yttrium-90 for the Zevalin therapy.
2. Please set the possession limit for the Sr-90 eye applicator as 50 mCi. That was its activity at the time of purchase in 1968.
3. List Holly Dalton, MS and Tim Kennelly, MS as authorized users for the SR-90 and Cs-137 calibration sources.

Alexander Grey was unavailable today. I spoke with one of the other physicists and they will obtain Mr. Grey's ABR certificate on Monday and I will forward it to you.

Per our discussion, if we are able to locate an authorized agent to dispose of our old sources including the Cs-137 calibration source, I will notify you at that time of its transfer.

Thanks and have a good weekend. Blair
