Licensee/Applicant Participant(s):	Organization:	Telephone No.:	
A.E. Witt, RSO-designate	Gammapar	610 296 7543	
Person(s) Calling: Sattar Lodhi			
Subject: Additional Information			
<p>Summary: The licensee requested to name a new RSO and a Site RSO. When I reviewed the license, I noted that the license is not written in accordance with NRC guidance. Additionally, the licensee's renewal application dated December 29, 1997, did not include procedures for verifying inventory of licensed material, nor the information was subsequently requested by the reviewer.</p> <p>I called Mr. Greg Maddaugh (who is requested to be named site RSO) to explain that only one RSO is listed on the license, and to request their procedures for maintaining accountability of licensed material. He was not available and I left a message for him to call me.</p> <p>Dr. Witt returned my call. I explain to him that only one person may be listed as RSO and that if they have procedures for keeping inventory of licensed material. He stated that the current license lists two RSOs. I explained to him that their license is not written in accordance with NRC policy and I have to not only include the requested changes but to write the amended license in accordance with NRC policy. He stated that he understands what is needed and will submit the information in two or three days. I gave him the control number and RI fax number.</p>
