Person(s) Calling: Sattar Lodhi			
Subject: Possession limits and Financial Assurance			
<p>Summary:</p> <p>The licensee requested to add material to its license. However, upon review of the license, I noted that the licensee is currently authorized for 500 millicuries of carbon-14 and 200 millicuries of hydrogen 3. These possession limits require financial assurance for decommissioning. Initial license had possession limits of 200 mCi for each of these isotopes, and Amendment No. 02 increased the possession limit of carbon 14 to 500 mCi. Even the initial limits required financial assurance.</p> <p>The reviewers did not request the licensee to provide financial assurance or to reduce their requested possession limits. The license does have a condition (168) requiring licensee to limit possession of material that will require financial assurance. This condition contradicts the approved possession limits.</p> <p>I called the licensee to discuss this. I explain to Mr. Busey the requirements for financial assurance and how to go about satisfying the requirement. He promised to get back to me after he has discussed the matter with his staff.</p>			
Action Required/Taken: Document/Do not process request
