

U.S. NUCLEAR REGULATORY COMMISSION		Conversation Date: March 17, 2005	
TELEPHONE CONVERSATION RECORD		Time: 14:30	
Mail Control or Report No. 135783		License No. 41-08165-08	Docket No. 030-09944
Licensee/Applicant Participant(s): 1) Terry Kneuttel, Licensing 2) James Colagross, Power Service Shops (ARSO) 3) William Raines, Manager, Environmental Radiation Monitoring and Instrumentation		Organization: Tennessee Valley Authority	Telephone No. (423)751-6673
Person(s) Calling: Marjorie McLaughlin			
Subject: License Renewal; Authorized Use			
Summary: I asked the licensee about the authorized use listed on their license. It currently states, "Possession, storage, repair, inspection, decontaminating, and testing of contaminated components and for possession incident to instrument calibration and/or repair." The renewal application did not list sealed sources or controls for sealed sources (leak test information, etc.). I asked if they possess any sealed sources for instrument calibration/repair. The licensee confirmed that they do not perform instrument calibration repair under this license, and that they possess no sealed or plated sources requiring inclusion on this license.			
Action Required/Taken: The Authorized use condition has been amended to remove this authorization. E-file sent to LAT
