LTC Mercier:

Item #7 Attachment, Subitem #6, states for Human Use Emerging Technologies...

"The training and experience of authorized users will be evaluated using the criteria in 10 CFR 35 that most closely matches the new technology, as well as, complete vendor training specific to the new equipment and/or procedure or equivalent training provided by an authorized user previously approved for the new technology."

My point I want to make is that vendor training is acceptable and training by a previously approved authorized user is acceptable as long as the previously approved authorized user received his/her training from the vendor. Our policy is to not allow training provided by an authorized user who received his/her training from another authorized user.

With regards to the issue of interim approval by the RSO, I see this in Item #7 Attachment, Subitems #5, 7 and 9c. Please tell me about your human-use subcommittee and non-human use committee as these may suffice.

I believe we were clear, if not in agreement, on the other issues.
