Re: Renewal Request for
Radioactive Material License #12-00369-02

Please accept this letter as a request to renew Siemens
Medical Systems, Inc. radioactive material license expiring
on January 31, 1995.

The radiation safety program and radioactive material usage
remains the same as indicated in the following documentation:

1. Original application dated October 30, 1989
2. Letter dated December 29, 1989

The only change to the license renewal request that is not
accurate in the original October 30, 1989 application is found
in Item 3, "addresses where licensed material will be used or
possessed". Radioactive sealed sources are utilized by the field
service engineers at temporary job sites throughout the U.S.
The following is a list of the district office locations where
the service engineers are assigned:
