A. E. Witt, RSO	Gammapar, L.L.C.	484-437 2564	
Person(s) Calling: Sattar Lodhi			
Subject: Material Accountability			
<p>Summary:</p> <p>The licensee responded to my earlier request for procedures for maintaining accountability of licensed material. The response included drawings of the plaques.</p> <p>I called Dr. Witt to explain that we needed information about maintaining source accountability. He stated that the sources are installed in plaques and there is no chance that the configuration will change. There are no plans to install new sources or rearrange the existing sources. I told him that in this case we may include a requirement that will necessitate request for an amendment prior to making any change in the configuration of sources. He stated that they will have no problem with such a requirement because he knows that there is not going to be any change in the configuration.</p>
