Licensee/Applicant Participant(s):	Organization:	Telephone No.:	
Mike Kinder, Contact Person	SMH Construction	304 877 6451	
Person(s) Calling: Sattar Lodhi			
Subject:			
<p>Summary:</p> <p>Licensee's renewal application referenced an old NRC document (PG 2-07) dated September 1994. Additionally, the location of use &amp; storage did not match the one listed on current license. The last inspection record does not document any change in the location of storage. Also, there are several models requestd, but the inspection records indicate that they licensee has only two gauges. The application appears to be a copy of its previous application. I called the licensee to request information requested in NUREG 1556, Volume 1, Revision 1 (although the application contains most of the requested information). I offered to help him obtain Appendix B to the NUREG from NRC web site, but he stated that he does not have access to internet right now, but will get it later. I told him that he may already have the NUREG because NRC sent these documents to all licensees.</p> <p>The RSO stated that Route 16 is now Robert Byrd Drive and that their storage location has not changed. He confirmed that they only have two Model 3400 gauges, and never had other gauges. He will fax a completed Appendix B soon.</p>			
Action Required/Taken: Document
