Tom,
I will be out of the office on Thursday.
Would you mind asking them to fax it to both 304-726-5121 and 304-726-5083?
Thanks, that way someone else will know it arrived.
If it not too much to ask, a call to my cell phone is another option: 301-697-8579.
I know this isn't fair to ask you.
Kenny

Got the fax and prepared your amendment. It is now undergoing an administrative review and preparation for sending to you. It is likely this will be done within a day or two. They will fax you a copy when they are done.

I faxed it 5/9/05, to the number below. I hated to bother you but I'm glad I did. Now we have both had trouble communicating with one another.
I hope you don't mind, but I think I'll call to follow-up. I'm sure you have other work to do. I appreciate this.

Just waiting for the fax copy of your response to my questions. I didn't see it . Was it sent? If I get the fax I plan to complete the license amendment tomorrow.

I hate to ask this because you've already been very helpful, but I'm being asked:
Would you care to estimate, predict, when the review would be complete? I'm really sorry.
Kenny Bohrер

Thank you Mr. Thompson.
I will fax this response as well.

I have completed a preliminary review of your application and have a few questions as follows:

1. Do you want the authorization for disassembly for Subitems 6.A. and 6.B. both ?

Response 5/9/05: No sir, good point. We would only be disassembling 6.A.

2. Is the training received by both proposed authorized user candidates that which you committed to provide in your July 17, 2004 letter?

Response 5/9/05: Yes, all radiation area workers receive the same training, provided by me. Our radiation safety committee also includes Floyd Johnson who is a certified RSO as well. We review the training program.

3. I note that you have indicated your March 25, 1994 application that you have fire suppression equipment, however, in the event that a problem occurs in burning the tracer what provisions do you have for bioassay of individuals who could be exposed to airborne activity?

Response 5/9/05: Our Radiation Safety Plan includes testing nasal swabs and urinalysis. I intend to ensure that we never do anything that will make that necessary, but that is what we would do. We conducted the test described in the report sent with the amendment request to prove the DU rod would not be significantly warmed during the tracer burn.

You may reply by facsimile to 610 337-5269 and refer to Mail Control 136937.

Thank you in advance.
