April 21, 2005

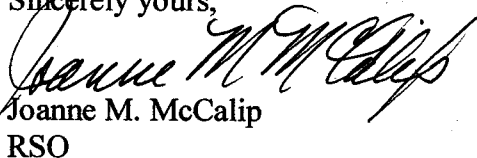

Dear Mr. Nicholson,

I am sending you this hard copy of the addendum to Item 10 of the license renewal of License No. 37-18212-01, Control No. 136165 for the Community College of Allegheny County. I am also going to Fax it to you.

As we have very low levels of radioactive material in our possession, the references to treatment of a major spill or emergency does not seem to apply to our facility. I have indicated on the addendum that we will adopt the procedures in Appendix R of NUREG-1556, Volume 11 for the procedures for maintaining security of licensed radioactive materials and emergencies, primarily those involving minor spills.

I hope that this is a satisfactory manner in which to ensure our safety, but not to burden our facility with practices and procedures for major emergencies which we will most likely not encounter.

Sincerely yours,

Joanne M. McCalip
RSO

Addendum Item 10

We will adopt the procedures for the safe use of radionuclides and emergencies as published in Appendix R of NUREG-1556, Volume 11, with emphasis on those procedures involving minor spills.

Joanne M. McCalip
Radiation Safety Officer
Community College of Allegheny County
