On June 24, 2002, Ben Schiappa, Civil Engineering Technician and Lawrence Chung, Civil Engineer pulled out all our nuclear gauges from the storage room in Annex 9 and opened each case to check the gauge. All twelve (12) gauges were counted and checked at that time.

Okay - now I am curious. What is the significance? In other words, what happened on June 24, 2002?

Dear Mr. Khan and Mr. Chung,

I received your facsimile dated May 10, 2005 regarding the audit and the police report. I am a little confused. In the last page of the police report, it states: "the property was last seen on 12-6-04 in storage room." Based on my conversations with you, I was under the assumption that when you performed inventory checks, as was done on 12-6-04 and previous inventory checks, you did NOT see the gauge - only the gauge carrying case. Please reply to this email with the date as to when you last saw the gauge - not just the case.

Your cooperation is appreciated.
