

UNITED STATES
NUCLEAR REGULATORY COMMISSION
REGION I
475 ALLENDALE ROAD
KING OF PRUSSIA, PENNSYLVANIA 19406-1415

May 25, 2005

Docket No. 03003309
Control No. 136759

License No. 45-02207-01

Mark Radar
Chief Operating Officer
Centra Health Corporation
Lynchburg General/Virginia Baptist Hospitals
1920 Atherholt Road
Lynchburg, VA 24501-1104

SUBJECT: CENTRA HEALTH CORPORATION, LICENSE AMENDMENT, CONTROL NO.
136759

Dear Mr. Radar:

This refers to your license amendment request. Enclosed with this letter is the amended license. Please note that:

1. Your license was written in a format compatible with the revised 10 CFR Part 35, effective October 24, 2002.
2. Unnecessary letters tied to your license in the last license condition were removed, since your requests in these letters were reflected in your license.

Please review the enclosed document carefully and be sure that you understand and fully implement all the conditions incorporated into the amended license. Please note the last condition on your license indicates that, "This license condition applies only to those procedures that are required to be submitted in accordance with the regulations." Therefore, any procedures submitted that were not required by regulation to be submitted, e.g., calibration of dose calibrators, will not be considered a part of your license and were not reviewed during the licensing process. These procedures will be reviewed during inspections, as necessary. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region I Office, Licensing Assistance Team, (610) 337-5239, so that we can provide appropriate corrections and answers.

An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(14).

Current NRC regulations and guidance are available at the NRC web site at <http://www.nrc.gov/materials/miau/mat-toolkits.html> and <http://www.nrc.gov/who-we-are/governing-laws.html> or by contacting the Government Printing Office (GPO) toll-free at 1-888-293-6498. The GPO is open from 7:00 a.m. to 9:00 p.m. EST, Monday through Friday (except Federal holidays).

M. Radar
Centra Health Corporation

2

Thank you for your cooperation.

Sincerely,

Original signed by Penny Lanzisera

MATERIALS LICENSE

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974 (Public Law 93-438), and Title 10, Code of Federal Regulations, Chapter I, Parts 30, 31, 32, 33, 34, 35, 36, 39, 40, and 70, and in reliance on statements and representations heretofore made by the licensee, a license is hereby issued authorizing the licensee to receive, acquire, possess, and transfer byproduct, source, and special nuclear material designated below; to use such material for the purpose(s) and at the place(s) designated below; to deliver or transfer such material to persons authorized to receive it in accordance with the regulations of the applicable Part(s). This license shall be deemed to contain the conditions specified in Section 183 of the Atomic Energy Act of 1954, as amended, and is subject to all applicable rules, regulations, and orders of the Nuclear Regulatory Commission now or hereafter in effect and to any conditions specified below.

Amendment No. 62

9. Authorized use:

- A. Any uptake, dilution and excretion study permitted by 10 CFR 35.100.
- B. Any imaging and localization study permitted by 10 CFR 35.200.
- C. Any diagnostic study or therapy procedure permitted by 10 CFR 35.300.
- D. Any manual brachytherapy procedure permitted by 10 CFR 35.400.
- E. Strontium-90 for ophthalmic radiotherapy permitted by 10 CFR 35.400.
- F. For use in calibrations and checking of licensee's survey instruments.

CONDITIONS

10. Licensed material may be used or stored only at the licensee's facilities located at:

- A. Lynchburg General Hospital, 1901 Tate Springs Road, Lynchburg, Virginia for all materials except those identified in Items 6.D, 6.E, and 6.F; and
- B. Virginia Baptist Hospital (VBH), 3300 Rivermont Avenue, Lynchburg, Virginia.

11. The Radiation Safety Officer for this license is Brian R. Hames, M.S.

12. Licensed material is only authorized for use by, or under the supervision of:

- A. Individuals permitted to work as an authorized user, authorized nuclear pharmacist, and/or authorized medical physicist in accordance with 10 CFR 35.13 and 35.14.
- B. The following individuals are authorized users for medical use as indicated:

Authorized UsersMaterial and Use

James L. Lynde, M.D.

35.100; 35.200; 35.300; 35.400

Parham R. Fox, M.D.

35.100; 35.200; 35.300

Kiah T. Ford, M.D.

35.100; 35.200; 35.300

Lawrence D. Larkin, M.D.

35.100; 35.200; 35.300

Richard L. Newton, M.D.

35.100; 35.200; 35.300

Robert L. Green, M.D.

35.100; 35.200; 35.300

James L. Hall, Jr., M.D.

35.100; 35.200; 35.300

C. The following individual is an authorized medical physicist as indicated:

Authorized Medical PhysicistsMaterial and Use

| | |
|-------------------|--|
| Brian Hames, M.S. | Strontium- 90 ophthalmic source for physical decay calculations and calibrations |
|-------------------|--|

D. The following individual is an authorized user for non-medical uses as indicated:

UsersMaterial and Use

| | |
|-------------------|---|
| Brian Hames, M.S. | Cesium-137 for calibration of instruments |
|-------------------|---|

13. In addition to the possession limits in Item 8, the licensee shall further restrict the possession of licensed material to quantities below the minimum limit specified in 10 CFR 30.35(d) for establishing decommissioning financial assurance.

Amendment No. 62

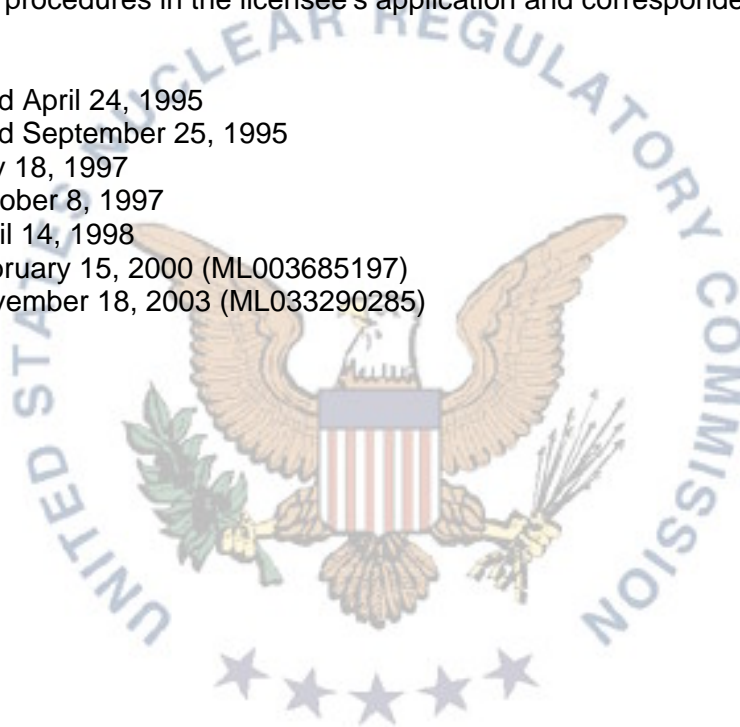

14. For sealed sources not associated with 10 CFR Part 35 use, the following conditions apply:
- A. Sealed sources shall be tested for leakage and/or contamination at intervals not to exceed six months or at the intervals specified in the certificate of registration issued by the U.S. Nuclear Regulatory Commission under 10 CFR 32.210 or under equivalent regulations of an Agreement State.
 - B. In the absence of a certificate from a transferor indicating that a leak test has been made within the intervals specified in the certificate of registration issued by the U.S. Nuclear Regulatory Commission under 10 CFR 32.210 or under equivalent regulations of an Agreement State, prior to the transfer, a sealed source received from another person shall not be put into use until tested and the test results received.
 - C. Sealed sources need not be tested if they contain only hydrogen-3; or they contain only a radioactive gas; or the half-life of the isotope is 30 days or less; or they contain not more than 100 microcuries of beta- and/or gamma-emitting material or not more than 10 microcuries of alpha-emitting material.
 - D. Sealed sources need not be tested if they are in storage and are not being used; however, when they are removed from storage for use or transferred to another person and have not been tested within the required leak test interval, they shall be tested before use or transfer. No sealed source shall be stored for a period of more than 10 years without being tested for leakage and/or contamination.
 - E. The leak test shall be capable of detecting the presence of 0.005 microcurie (185 becquerels) of radioactive material on the test sample. If the test reveals the presence of 0.005 microcurie (185 becquerels) or more of removable contamination, a report shall be filed with the U.S. Nuclear Regulatory Commission in accordance with 10 CFR 30.50(c)(2), and the source shall be removed immediately from service and decontaminated, repaired, or disposed of in accordance with Commission regulations.
 - F. Tests for leakage and/or contamination, including leak test sample collection and analysis, shall be performed by the licensee or by other persons specifically licensed by the U.S. Nuclear Regulatory Commission or an Agreement State to perform such services.
 - G. Records of leak test results shall be kept in units of microcuries and shall be maintained for 5 years.
15. The licensee shall conduct a physical inventory every six months, or at other intervals approved by the U.S. Nuclear Regulatory Commission, to account for all sources and/or devices received and possessed under the license. Records of inventories shall be maintained for 5 years from the date of each inventory and shall include the radionuclides, quantities, manufacturer's name and model numbers, and the date of the inventory.
16. Sealed sources or detector cells containing licensed material shall not be opened or sources removed from source holders by the licensee.
17. The licensee is authorized to transport licensed material in accordance with the provisions of 10 CFR Part 71, "Packaging and Transportation of Radioactive Material."

Amendment No. 62

18. Except as specifically provided otherwise in this license, the licensee shall conduct its program in accordance with the statements, representations, and procedures contained in the documents, including any enclosures, listed below. This license condition applies only to those procedures that are required to be submitted in accordance with the regulations. Additionally, this license condition does not limit the licensee's ability to make changes to the radiation protection program as provided for in 10 CFR 35.26. The U.S. Nuclear Regulatory Commission's regulations shall govern unless the statements, representations, and procedures in the licensee's application and correspondence are more restrictive than the regulations.

- A. Application dated April 24, 1995
- B. Application dated September 25, 1995
- C. Letter dated July 18, 1997
- D. Letter dated October 8, 1997
- E. Letter dated April 14, 1998
- F. Letter dated February 15, 2000 (ML003685197)
- G. Letter dated November 18, 2003 (ML033290285)

For the U.S. Nuclear Regulatory Commission
