

Approved For Publication

The Commission delegated to the EDO (10 CFR 1.32(c)) the authority to develop and promulgate rules as defined in the APA (5 U.S.C. 551(4)) subject to the limitations in NRC Management Directive 9.17, Organization and Functions, Office of the Executive Director for Operations, paragraphs 0213, 038, 039, and 0310.

The attached direct final rule entitled “List of Approved Spent Fuel Storage Casks: NAC-UMS Revision 4,” amends 10 CFR Part 72 by revising the NAC International, Inc., NAC-UMS Universal Storage System listing within the “List of approved spent fuel storage casks.” This amendment will revise the NAC-UMS Universal Storage System by replacing the specific term “zircaloy” with the more generic term “zirconium alloy”; revising the definitions of “operable” and “site specific fuel”; revising vacuum drying pressure and time limits; revising short-term temperature limits and completion times for the heat removal system; clarifying the surface dose rate surveillance; adding a dissolved boron concentration option; deleting a redundant boron concentration administrative control; adding an alternate site-specific design basis earthquake analysis; and incorporating editorial and administrative changes.

This direct final rule does not constitute a significant question of policy, nor does it amend regulations contained in 10 CFR Parts 7, 8, or 9, Subpart C, concerning matters of policy. I, therefore, find that this rule is within the scope of my rulemaking authority and am proceeding to issue it.
