  - Main Turbine and Generator Work
  - Rx Vessel Head Inspection
  - Hx Hydro Lance and Eddy Current
- 3<sup>rd</sup> Priority    Remaining Scheduled Work

### Communication Improvement Initiatives

Due to the recent problems encountered with outage activities, changes are being made to improve communication and turnovers and to focus our efforts on achieving all green shutdown safety assessment parameters. Effective 4/13/2004 at 0600 the following expectations are in effect:

#### Outage Briefing Schedule - NSB Cafeteria:

| Day Shift   | Night Shift | Activity   |
|-------------|-------------|--|
| 0600 – 0640 | 1800 – 1840 | OCC Turnover **  |
| 0645 – 0725 | 1845 – 1925 | Supervisor Communication of OCC Turnover to Work Force |
| 0730 – 0800 | 1930 – 2000 | Supervisor Feedback to OCC of Turnover to Work Force   |

#### \*\* Outage Briefing Schedule Notes:

- The following personnel are required to attend the OCC turnover meeting: Upcoming shift supervisory personnel, General Supervisors, temporary supervisors, managers, and other personnel performing in a supervisory capacity for outage activities.
- Attendance will be taken at the OCC turnover meeting.
- It is recognized that this will result in longer durations for the outage. Since the safest place to be is on schedule, the outage schedule is being revised to include these meetings.
- Very few exceptions will be made to the briefing schedule requirement. The OCC will control all exceptions.

#### Additional Changes:

- Just in Time Information Sharing identified in the Priority Working Schedule shall be developed and presented for the associated significant task.
- A responsible Manager will be assigned to selected work activities as directed by the OCC. These managers will monitor the job from pre-job briefing through completion or end of their shift.

These changes are being implemented immediately. Please provide feedback to your supervisor on ways to improve this process.

## Point Beach Nuclear Plant U1R28 Refueling Outage

|   |
|---|
| <b>Safety Topic for week of April 11-17th</b>   |
| <b>Theme for the week</b>   |
| This week's theme is <b>Housekeeping</b> . What does housekeeping have to do with safety? Lots! A clean and orderly workplace is essential to avoid falls, fires and many other kinds of accidents and injuries.  |
| <b>Daily Safety Snippets</b>  |
| <b>Sunday</b>   |
| <b>"Outage rubble can lead to trouble"</b><br>On April 21, 2001 the Point Beach declared an Unusual Event due to a small fire in the Unit 1 containment building during a refueling outage. The fire was in a bag of rags on the manway platform of the Alpha steam generator in Unit 1. The fire brigade was summoned and put out the fire within about 20 minutes.  |
| <b>Monday</b>   |
| <b>"When you clean up hazards, you scrub out accidents"</b><br>Why is good housekeeping important? Just think about it. A clean workplace has less fire hazards, fewer safety hazards and just plain looks better. A clean workplace promotes pride in your job.  |
| <b>Tuesday</b>  |
| <b>"Improper storing can be more than annoying"</b><br>What are those yellow cabinets for? Remember to properly store all flammable chemicals in fire cabinets. These should be in properly labeled containers and the storage capacity of the cabinet should never be exceeded.  |
| <b>Wednesday</b>  |
| <b>"Avoid a fatal scene; Keep your job site clean"</b><br>A building contractor died when he was trapped in the burning basement of a house under construction. Another worker was using an oxyacetylene cutting torch to cut I-beams over the basement of the house. Stray sparks set fire to some sawdust and scrap wood used as packing material. The worker escaped and sounded the alarm, however the contractor jumped into the basement, in a fatal attempt to put the fire out. |
| <b>Thursday</b>   |
| <b>"Ashes to ashes, dust to dust; A clean workplace is a must"</b><br>At the PI a couple of years ago during a refueling outage on unit 1, welding sparks ignited a small fire in some rags in containment. An alert fire watch was able to put out the fire immediately but the fire was preventable with some very basic housekeeping practices.  |
| <b>Friday</b>   |
| <b>"Don't be a slob; Clean up after each job"</b><br>After going through the snippets for this week makes you feel as if you have just gotten a lecture from your mother about keeping your room tidy, that's okay. Mom was right! Housekeeping is everyone's job and working together will not only ensure a clean workspace, it will also help to ensure a safe one.  |
| <b>Saturday</b>   |
| <b>"Clean up and care will speed up repair"</b><br>It is a good practice to assign one coworker as the "housekeeping conscious" on each job. This person is responsible not to clean up after you but to remind everybody on the job to clean up after themselves. This helps to minimize the gradual buildup of clutter as the job progresses.   |
