EPR Design Description

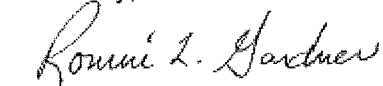

Ref.: 1. Letter, Jerry S. Holm (Framatome ANP) to Document Control Desk (NRC),
"Pre-Application Review of the EPR," NRC:05:008, February 8, 2005.

Framatome ANP, Inc. (FANP) outlined the proposed plan for the pre-application review of the EPR in Reference 1. In accordance with the plan for Phase 1 of the EPR pre-application review as described in Reference 1 and discussed in a public meeting between FANP and the NRC on March 24, 2005, FANP has prepared the attached "EPR Design Description."

The purpose of the document is to provide background information for pre-application discussions with the NRC and to support the NRC review of EPR-related topical reports planned for submittal prior to the design certification application. The "EPR Design Description" is provided for information only and is not intended for formal review and approval. Note that the information contained within the document is subject to change and that the final design information will be provided in the application for design certification.

Framatome ANP looks forward to further pre-application discussions with the NRC. Please contact Ms. Sandra M. Sloan, Regulatory Affairs Manager for New Plants Deployment, for further assistance. She may be reached by telephone at 434-832-2369 or by e-mail at sandra.sloan@framatome-anp.com.

Sincerely,

Ronnie L. Gardner, Manager
Site Operations and Regulatory Affairs
