UNITED NUCLEAR CORP. TWI REQUESTING APPROVAL FOR SHIPMENT  
URANIUM METAL

We have reviewed the United Nuclear teletype dated April 13,  
requesting approval of a single shipment of 4.5 kg uranium  
metal, 10% enriched containing 450 grams U-235.

Although the shipping container is not adapted for bulk ship-  
ments of special nuclear material, we see no objection to a  
one time only shipment of this small quantity of uranium.
