United Nuclear Corporation requests establishing a fixed shipment route between Hematite, Missouri, and Apollo, Pennsylvania, which involves specified transshipment points. The licensee would obtain certificates of non-commingling from each carrier involved and at the points of transshipment. In addition, this certificate dated May 15, 1964, is intended to supersede the certificate we had previously approved in our memorandum, Luke to Nussbaumer, dated May 20, 1964, for establishing a fixed shipping route between Hematite, Missouri, and New Haven, Connecticut. The revised certificate has removed all reference to source materials. We recommend approval of both the new fixed shipping route to Apollo, Pennsylvania, and the revised certificate for the previously approved shipping route to New Haven, Connecticut.
