As requested, Attachment A, "Completed NRC Form 536," contains a separate NRC Form 536 [August 2000], "Operator Licensing Examination Data," for each of our Mid-West Regional Operating Group facilities addressed by the RIS. The information provided for each facility includes: the proposed examination preparation schedule for calendar years (CYs) 2003 through 2006; the estimated number of applicants and proposed dates for each of the initial operator license examinations through CY 2006; and the estimated number of candidates that plan to take the Generic Fundamentals Examination in CYs 2003 and 2004.

If you have any questions or concerns regarding this information, please contact Mr. Brian Sweeney at (630) 657-2836.

Respectfully,

Patrick R. Simpson  
Manager – Licensing, Dresden and Quad Cities Nuclear Power Stations  
Mid-West Regional Operating Group

UNITED STATES  
NUCLEAR REGULATORY COMMISSION

REGION III  
801 WARRENVILLE ROAD  
LISLE, ILLINOIS 60532-4351

July 16, 2003

Mr. John L. Skolds, President  
and Chief Nuclear Officer  
Exelon Nuclear  
Exelon Generation Company, LLC  
4300 Winfield Road  
Warrenville, IL 60555

SUBJECT: CONFIRMATION OF INITIAL/REQUALIFICATION OPERATOR LICENSE  
EXAMINATIONS: CLINTON POWER STATION

Dear Skolds:

In a letter dated July 18, 2002, (RS-02-123) your staff requested we schedule an initial license operator examination in January 2004 and in November 2004. In a subsequent telephone conversation on June 19, 2003, between Mr. D. McNeil of my staff and Mr. K. McCall, Clinton Station Operations Training Manager, the requested examinations were tentatively scheduled to occur during the weeks of January 5, 2004, and January 12, 2004. The second examination was tentatively scheduled to occur during the weeks of November 15, 2004, and November 22, 2004. On-site validation of the examination will occur at the station approximately 3 weeks before the examinations are administered. In the unlikely event that we are unable to support the examinations during the scheduled weeks, we will inform you immediately upon discovery of such conditions and make arrangements to administer the examinations at a mutually acceptable date.

As stated in your letter, your staff will develop the examinations. Mr. McCall indicated that you are training approximately 13 candidates for the January 2004 examination and 11 candidates for the November 2004 examination. Please inform us if the number of candidates declines below 10 for either examination as this will impact the examination schedule. Mr. McCall confirmed that the week of September 29, 2003, scheduled for the biennial requalification program inspection (IP 71111.11B), was still within the anticipated requalification examination administration cycle. Please inform us at your earliest opportunity if you discover you need to change the scheduled dates for either of the examinations.

A supplementary letter will be sent to the training department approximately 120 days prior to the initial examinations informing them of the chief examiner's name. The letter will also outline examination security expectations, list the materials required by the NRC to conduct the examination, reconfirm the examination dates, and reconfirm the number of candidates you have in the training program. If you have any questions concerning this information, please contact Mr. B. Palagi of my staff at 630-829-9611.

NRC Docket Nos. 50-254 and 50-265

**Subject:** Response to NRC Regulatory Issue Summary 2003-14  
"Preparation and Scheduling of Operator Licensing Examinations"

**Reference:** NRC Regulatory Issue Summary (RIS) 2003-14, "Preparation and Scheduling of Operator Licensing Examinations," dated August 27, 2003.

In the Reference letter, the NRC requested licensees to voluntarily submit a response concerning initial operator licensing examination needs, including an estimate of the number of applicants to be examined and intentions regarding the preparation of the examinations.

Attachments 1 through 10 provide the responses to RIS 2003-14 for the Exelon Generation Company, LLC (Exelon) and AmerGen Energy Company, LLC (AmerGen) plants identified above. The operator licensing examination information for each facility is provided on a separate NRC Form 536.

During Calendar Year CY 2005, a total of 6 candidates are expected to take the dual site Limited Senior Reactor Operator (LSRO) initial license examination as indicated in Attachment 6. The schedule for the indicated exam is as follows: the written exam and part of the operating exam will be given at Limerick Generating Station (LGS); the remainder of the operating exam will be completed at Peach bottom Atomic Power Station (PBAPS). Since the LSRO exam is a dual site exam that involves both LGS and PBAPS, rather than repeating the same information on both attachments, the exam scheduling information is provided on Attachment 6 for LGS only and Attachment 8 for PBAPS references Attachment 6.

If you have any questions or require additional information, please do not hesitate to contact us.

Sincerely,

Michael P. Gallagher  
Director, Licensing & Regulatory Affairs  
Exelon Generation Company, LLC  
AmerGen Energy Company, LLC

UNITED STATES  
NUCLEAR REGULATORY COMMISSION

REGION III  
801 WARRENVILLE ROAD  
LISLE, ILLINOIS 60532-4351

March 4, 2004

Mr. Christopher M. Crane  
President and Chief Nuclear Officer  
Exelon Nuclear  
Exelon Generation Company, LLC  
4300 Winfield Road  
Warrenville, IL 60555

SUBJECT: CLINTON POWER STATION  
CONFIRMATION OF INITIAL OPERATOR LICENSE EXAMINATIONS

Dear Mr. Skolds:

In a letter dated September 26, 2003, your staff responded to NRC Regulatory Issue Summary (RIS) 2003-14, "Preparation and Scheduling of Operator Licensing Examinations," for all Exelon Nuclear Stations. This letter responds to the request for initial license examinations at Clinton Power Station, Unit 1.

Initial license examinations were requested during the weeks of June 6 and June 13, 2005, and during the week of August 27, 2007. Because of a heavy work load, the examination requested for June 6 and June 13 was rescheduled to the weeks of July 11 and July 18, 2005, per a telephone conversation between Mr. D. McNeil of my staff and Mr. T. Shortell, Clinton Station Training Director. That examination has been scheduled and a chief examiner assigned to that examination. The examination requested for August 2007 will be scheduled as we approach that date.

On-site validation of the examinations will occur at Clinton Power Station approximately 3 weeks before the examination administration date. In the unlikely event that we are unable to support the examination during the scheduled weeks, we will inform you immediately upon discovery of such conditions and make arrangements to administer the examinations at a mutually acceptable date.

As indicated in your RIS response letter, your staff will develop the examinations. Your letter also indicated that you are training 13 candidates for the examination in July 2005. Please inform us if the number of candidates decreases below 10 as this will impact the examination schedule.

A supplementary letter will be sent to the training department approximately 120 days prior to the initial examination informing them of the chief examiner's name. The letter will also outline examination security expectations, list the materials required by the NRC to conduct the examination, reconfirm the examination dates, and reconfirm the number of candidates you have in the training program. If you have any questions concerning this information, please contact Mr. B. Palagi of my staff at 630-829-9611.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Sincerely,

A handwritten signature in black ink, appearing to read 'R. Lanksbury', with a stylized flourish at the end.

Roger D. Lanksbury, Chief  
Operations Branch  
Division of Reactor Safety

Docket No. 50-461

Subject: Response to NRC Regulatory Issue Summary 2004-10  
"Preparation and Scheduling of Operator Licensing Examinations"

Reference: NRC Regulatory Issue Summary (RIS) 2004-10, "Preparation and Scheduling of Operator Licensing Examinations," dated June 14, 2004.

In the Reference letter, the NRC requested licensees to voluntarily submit a response concerning initial operator licensing examination needs, including an estimate of the number of applicants to be examined and intentions regarding the preparation of the examinations.

Attachments 1 through 10 provide the responses to RIS 2004-10 for the Exelon Generation Company, LLC (Exelon) and AmerGen Energy Company, LLC (AmerGen) plants identified above. The operator licensing examination information for each facility is provided on a separate NRC Form 536.

During Calendar Years (CYs) 2005 and 2008, a total of 6 candidates per year are expected to take the dual site Limited Senior Reactor Operator (LSRO) initial license examination as indicated in Attachment 6. The schedule for the indicated exam is as follows: the written exam and part of the operating exam will be given at Limerick Generating Station (LGS); the remainder of the operating exam will be completed at Peach Bottom Atomic Power Station (PBAPS). Since the LSRO exam is a dual site exam that involves both LGS and PBAPS, rather than repeating the same information on both attachments, the exam scheduling information is provided on Attachment 6 for LGS only and Attachment 8 for PBAPS references Attachment 6.

If you have any questions or require additional information, please do not hesitate to contact us.

Sincerely,

Michael P. Gallagher  
Director, Licensing & Regulatory Affairs  
Exelon Generation Company, LLC  
AmerGen Energy Company, LLC

FEB 07 2005

March 7, 2005

Mr. Christopher M. Crane  
President and Chief Nuclear Officer  
Exelon Nuclear  
Exelon Generation Company, LLC  
4300 Winfield Road  
Warrenville, IL 60555

Dear Mr. Crane:

In a telephone conversation on January 21, 2005, between Mr. Charles Phillips and Mr. G.D Setzer, Senior Training Instructor, arrangements were made for the administration of licensing examinations at the Clinton Nuclear Power Station the week(s) of July 11 and 18, 2005. In addition, the NRC will make an examination validation visit to your facility the week of June 20, 2005.

As agreed during the telephone conversation, your staff will prepare the examinations based on the guidelines in Revision 9 of NUREG-1021, "Operator Licensing Examination Standards for Power Reactors." The NRC regional office will discuss with your staff any changes that might be necessary before the examinations are administered.

To meet the above schedule, it will be necessary for your staff to furnish the examination outlines by April 11, 2005. The written examinations, operating tests, and the supporting reference materials identified in Attachment 2 to ES-201 will be due by May 27, 2005. Pursuant to 10 CFR 55.40(b)(3), of the Code of Federal Regulations (10 CFR 55.40(b)(3)), an authorized representative of the facility licensee shall approve the outlines, examinations, and tests before they are submitted to the NRC for review and approval. All materials shall be complete and ready to use. Any delay in receiving the required examination and reference materials, or the submittal of inadequate or incomplete materials, may cause the examinations to be rescheduled.

In order to conduct the requested written examinations and operating tests, it will be necessary for your staff to provide adequate space and accommodations in accordance with ES-402, and to make the simulation facility available on the dates noted above. In accordance with ES-302, your staff should retain the original simulator performance data (e.g., system pressures, temperatures, and levels) generated during the dynamic operating tests until the examination results are final.

Appendix E of NUREG-1021 contains a number of NRC policies and guidelines that will be in effect while the written examinations and operating tests are being administered.

To permit timely NRC review and evaluation, your staff should submit preliminary reactor operator and senior reactor operator license applications (Office of Management and Budget

ML 050670250

(OMB) approval number 3150-0090), medical certifications (OMB approval number 3150-0024), and waiver requests (if any) (OMB approval number 3150-0090) at least 30 days before the first examination date. If the applications are not received at least 30 days before the examination date, a postponement may be necessary. Signed applications certifying that all training has been completed should be submitted at least 14 days before the first examination date.

This letter contains information collections that are subject to the *Paperwork Reduction Act of 1995* (44 U.S.C. 3501 et seq.). These information collections were approved by the Office of Management and Budget, approval number 3150-0018, which expires on June 30, 2006. The public reporting burden for this collection is estimated to average 500 hours per response, including the time for reviewing instructions, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments on any aspect of this collection of information, including suggestions for reducing the burden, to the Information and Records Management Branch (T-6 F33), U.S. Nuclear Regulatory Commission, Washington, D.C. 20555-0001, or by Internet electronic mail at [BJS1@nrc.gov](mailto:BJS1@nrc.gov); and to the Desk Officer, Office of Information and Regulatory Affairs, NEOB-10202, (3150-0018), Office of Management and Budget, Washington, D.C. 20503-0001.

The NRC may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Thank you for your cooperation in this matter. Mr. Setzer has been advised of the policies and guidelines referenced in this letter. If you have any questions regarding the NRC's examination procedures and guidelines, please contact Mr. Charles Phillips at 630-829-9739, or me at 630-829-9631.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC's Public Document Room or from the Publicly Available Records (PARS) component of the NRC's Agencywide Documents Access and Management System (ADAMS). ADAMS is accessible from the Electronic Reading Room page of the NRC's public Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

/RA/

Warrenville, IL 60555

**SUBJECT: OPERATOR LICENSING EXAMINATION APPROVAL**

Dear Mr. Crane:

The purpose of this letter is to confirm the final arrangements for the upcoming operator licensing examinations at the Clinton Power Station.

The U. S. Nuclear Regulatory Commission (NRC) has completed its review of the operator license applications in connection with this examination and will separately provide a list of approved applicants to Mr. Robert Swenson, Training Department. Note that any examination waivers have been addressed in *separate correspondence*.

The NRC has approved the subject examinations and hereby authorizes you to administer the written examinations in accordance with Revision 9 of NUREG-1021, "Operator Licensing Examination Standards for Power Reactors," during the week of July 25, 2005. The NRC staff will administer the operating tests during the week of July 18, 2005.

Please contact Mr. Charles Phillips at 630-829-9739 if you have any questions or identify any errors or changes in the license level (RO or SRO) or type of examination (partial or complete written examination and/or operating test) specified for each applicant.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of the NRC's Agencywide Documents Access

and Management System (ADAMS). ADAMS is accessible from the Electronic Reading Room page of the NRC's public Web site at <http://www.nrc.gov/reading-rm/adams.html>.
