Mr. Robert Lowenstein
Assistant Director of Regulation
United States Atomic Energy Commission
Washington, D. C. 20545

United Nuclear Corporation
Wood River Junction, R. I.
Incident on July 24, 1964

Dear Mr. Lowenstein:

As a representative of my company on the Governing Committee of the Nuclear Energy Liability Insurance Association, I have been asked to contact you and attempt to arrange an appointment to discuss the above-captioned incident.

It was agreed some time ago that we would discuss critical nuclear incidents with you, at least until such time as we have had some experience in handling these matters. As far as we know, there have been no third party claims filed as a result of this incident but there is always the possibility that such claims may still be filed. There is also a question of expense incurred by the United Nuclear Corp. and we now have this under consideration.

I shall appreciate it if you will advise me whether it will be convenient for me to call on you on June 8, 9 or 10 and, if so, the time of day you will be available.

Sincerely yours,

A. W. Hegwood
