Attention: Mr. L. J. Swallow, Manager
Nuclear & Industrial Safety

Gentlemen:

Enclosed is an amendment to Title 10, Chapter 1, Code of Federal Regulations, Part 71, which was published in the FEDERAL REGISTER on April 17, 1970. This amendment provides an additional general license for delivery of licensed material to a carrier for transport in packages specifically licensed for use by another licensee, under certain stated conditions. One of the conditions is that the specific license authorizes such use under the general license.

Pursuant to Title 10, Code of Federal Regulations, Parts 70 and 71, the specific licenses identified on the enclosed list dated April 17, 1970, are hereby amended to authorize the use of the packages identified under the general license provided by paragraph 71.7(b) of 10 CFR 71. In order to use such packages under the general license, the conditions specified in paragraph 71.7(b) must be fulfilled.

If you have any question regarding the implementation of the general license provisions of paragraph 71.7(b), please let us know. A copy of this letter should be filed with your Special Nuclear Material License.
