Gentlemen:

The Office of Nuclear Material Safety and Safeguards, Division of Industrial and Medical Nuclear Safety, is planning to sponsor a Fuel Cycle Licensee Workshop in mid-September in the Washington, D.C. area. The purpose of the workshop is to bring together NRC officials and fuel cycle licensee representatives to discuss various NRC programs and policies. The format for the workshop will be similar to that of previous workshops.

We are currently in the early planning stages and would appreciate your thoughts on topics for and format of the workshop. Suggested agenda items could include presentations from either the NRC or from licensee representatives. Current items under consideration are integrated safety analysis, Part 20 implementation, decommissioning, Bulletin 91-1, and recent licensee events.

If there are specific items that you would like to see on the agenda or if you think a different format would be beneficial, suggestions should be provided to Robert Wilson (301-504-2126) or Merri Horn (301-504-2606) by May 8, 1992. We will provide further information on the workshop at a future date.

Sincerely,

/S/

John W. N. Hickey, Chief
Fuel Cycle Safety Branch
Division of Industrial and
Medical Nuclear Safety, NMSS
