Attention: Mr. L. J. Swallow, Manager
Nuclear and Industrial Safety

Gentlemen:

Pursuant to Title 10, Code of Federal Regulations, Part 70, Special Nuclear Material License No. SNN-33, dated April 21, 1965, is hereby amended to extend the expiration date to December 31, 1968, in accordance with your application dated July 19, 1968.

All other conditions of this license shall remain the same.

Subject: SNM 33, Docket 70-36, Extension of Expiration Date

Dear Sir:

Extension of special nuclear material license 33 expiration date from September 30, 1968 to December 31, 1968 is respectfully requested. This request is made consistent with a similar request for extension of license SNM 777 (reference letter of 7/19/68).

Preparation of the renewal application will proceed in parallel with that for SNM 777 on the following schedule:

| | |
|---|----------|
| Review existing license and initiate action to update | 8/23/68 |
| Prepare draft submittal | 10/18/68 |
| Formal submittal | 11/29/68 |

During preparation of the draft submittal UNC would expect to review with the AEC portions of the application as they are completed. As for license SNM 777, a single formal submittal of the renewal application will be made.

The additional time (relative to SNM 777) requested for SNM 33 is to allow time for the final preparation noting that the same staff is involved in preparation of both applications.

Please let us know if you require additional information relative to this request.

Respectfully yours,

L. J. Swallow, Manager
Nuclear and Industrial Safety
Commercial Products Division
