SNM-777, Amendment No. 47

United Nuclear Corporation
Hematite, Missouri 63047

Attention: Mr. L. J. Swallow, Manager
Nuclear and Industrial Safety
Commercial Products Division

Gentlemen:

Pursuant to Title 10, Code of Federal Regulations, Part 70, Special Nuclear Material License No. SNM-777, dated November 25, 1964, is hereby amended to authorize the activities described in your application (NIS:CP:REK-17) dated October 8, 1968, as supplemented by applications dated October 15 and October 26, 1968.

All other conditions of this license shall remain the same.

In the application submitted for this license amendment, you requested that Drawing B-304236 and the sketch of the 19H Powder Facility be withheld from public inspection pursuant to 10 CFR 2, "Rules of Practice". The Commission has determined that public inspection of this information is not required in the public interest nor by 10 CFR 9, and would adversely affect the United Nuclear Corporation. Accordingly, Drawing B-304236 and the sketch of the 19H Powder Facility submitted in your application dated October 8, 1968, are being withheld from public inspection as provided in Section 2.790, 10 CFR 2. Such withholding from public inspection shall not, however, affect the right, if any, of persons properly and directly concerned to inspect such information.

FOR THE ATOMIC ENERGY COMMISSION
