We have reviewed Combustion Engineering's (Hematite) Radiological Contingency Plan as amended by additional information submitted on September 3, 1982. We find that the licensee's amended plan meets the requirements of the Order issued by the Commission on February 11, 1981.

Please amend license No. SNM-33 by replacing conditions 12 and 24 with the following condition:

The licensee shall maintain and execute the response measures of his Radiological Contingency Plan submitted to the Commission on January 27, 1982, and revised on September 3, 1982. The licensee shall also maintain implementing procedures for his Radiological Contingency Plan as necessary to implement the plan. The licensee shall make no change in his Radiological Contingency Plan that would decrease the response effectiveness of the Plan without prior Commission approval as evidenced by license amendment. The licensee may make changes to his Radiological Contingency Plan without prior Commission approval if the changes do not decrease the response effectiveness of the plan. The licensee shall maintain records of changes that are made to the Plan without prior approval for a period of two years from the date of the change and shall furnish the Chief, Material Licensing Branch, Division of Fuel Cycle and Material Safety, NMSS, U. S. Nuclear Regulatory Commission, Washington, D. C. 20555, and the appropriate NRC Regional Office specified in Appendix D of 10 CFR Part 20, a report containing a description of each change within six months after the change is made.

F. D. Fisher, Section Leader  
Environmental Radiation and  
Emergency Support Section  
Uranium Fuel Licensing Branch  
Division of Fuel Cycle and  
Material Safety, NMSS
