John

This is the allegation file that went over the 180 day mark about 3 and a half months ago, is currently at 277 days, and reaches the 360 day mark on October 6. While that is still a ways away, are we close to closing this issue. One of our goals is to close 100% of the allegation files in 360 days.

I understand you have completed the followup inspection. Will the followup be documented in an inspection report, and have you or your staff drafted the attachment to the closure letter which will describe the alleged's issues that were still open, and what you found during your inspection of those issues.

Let me know when you get a chance.

thx

dan
