The alleged's lawyer called from his cellular phone (not a very good connection). He indicated that he has taken depositions from several employees who have raised concerns regarding VT2 test taking flaws. The attorney also indicated that he has a 10/20/97 memo from a Carl Fricker (sp?) recognizing the flaws and committing to making modifications to the test or revamping it totally. Alleger re-took test and it was not revamped or modified. Attorney indicates that it still has not been changed. Attorney said he will send us info (OI may already have this info). Also, attorney indicated they are still at the DOL-ALJ stage. Attorney wanted Dave to call him. I asked why. Attorney wanted to know OI outcome. I told him that OI is still open (OI Case #1-98-007) and when we are done, we will share a synopsis with both parties. Attorney does not need a call back. Call ended.
