Subject: DOL complaint filed by RI-98-A-0016 alleged. (PSE&G VT-2 alleged)

I received my copy of the DOL complaint today. It is very brief, provides no new information and is much less detailed than the information that has already been provided to us. Where we would normally have a repanel to discuss the content of the DOL complaint, I don't really think that one is necessary in this instance. Please let me know if you disagree. FYI, we are currently drafting a status letter to the individual that closes his technical issues, based on the licensee's response to our referral. I will also acknowledge receipt of the DOL complaint in the status letter.
