SUBJECT: SEABROOK STATION, UNIT NO. 1 - CORRECTION OF AMENDMENT  
NO. 104, MISCELLANEOUS CHANGES TO THE TECHNICAL  
SPECIFICATIONS (TAC NO. MC1976)

Dear Mr. St. Pierre:

On July 18, 2005, the Nuclear Regulatory Commission (NRC) staff issued the subject amendment in response to your application transmitted by letter dated February 4, 2004, as supplemented by letter dated March 16, 2005. The amendment revised various sections of the Seabrook Station, Unit No. 1 (Seabrook) Technical Specifications (TSs), including TS Section 6, Administrative Controls.

Subsequent to the issuance, your staff identified a number of errors in several of the amended TS pages. These errors resulted from the issuance of other amendments during the review of Amendment No. 104 to Facility Operating License Number NPF-86 which affected several of the same TS pages. These changes should have been incorporated into the TS pages issued by the NRC. It should be noted that some pages were correct as originally issued, however for convenience and clarity, a complete set is being provided with this letter. Side bars highlight the areas of correction made with Amendment No. 104. We apologize if these errors caused you any inconvenience.

Sincerely,
