**Subject:** here is the closeout/status letter enclosure draft for 2004-0010  
**Place:** R1Allegation

Note that for Concern 1, I put: "NRC has decided to contact PSEG regarding this concern, to obtain additional information regarding whether in the past, relief valves removed from the plant successfully passed the as-found operability tests. We will notify you of the results, and any regulatory implications, when the review is complete."  
Every other concern is closed.
