Subject: Call With Allegor in 2001-A-0126

Dave,

I spoke directly with the allegor for allegation 2001-A-0126 at Hope Creek. He had no problem with referring his concerns to PSEG nor mentioning his name. He is interested in personally getting a copy of his whole body count record and dose calculation. I indicated that we would ask the licensee to provide that to him. If they refuse (and they can based on the regulations in this area - they only have to provide him with a record of his dose), then we will ask them to either provide those records to us or make them available for future review by the NRC. The allegor indicated that if he can not receive these records directly, he is content with having us review them and explaining to him what they mean.

I'll put the referral letter together next week that states this information. I got the impression from the individual tried to go as far up the PSEG management chain as he could to get his answer before he came to us.

Rich Barkley
