**Subject:** Referral of Non-Allegation Involving Excessive Working Hours at Salem Unit 1

Dave,

As directed by the APM for file 2001-0049(XXXX), I verbally referred this concern regarding excessive working hours to a member of the PSEG Nuclear Licensing Group. I will follow up this referral tomorrow via discussion with his supervisor to ensure that the concern was properly passed on and PSEG management has considered it for possible action.

This avenue for referring this concern appeared appropriate given the nature of the concern (i.e., excessive working hours during the ongoing, short duration outage); moreover, it was much more timely and less burdensome than a formal referral letter. Salem Unit 1 has been in a refueling outage since April 4, 2001, and will exit this outage shortly; thus a written referral would have given PSEG very little, if any, time to address such working hour concerns in the remaining days of their outage.

Please place this documentation in your files for future reference.

Rich
