

Joseph F. Picciano
Acting Regional Director
Federal Emergency Management Agency

RE: INDIAN POINT RADIOLOGICAL EVACUATION PLAN

We, the undersigned are First Responders. We include Police Officers, Fire Fighters, EMS Workers, Transportation Workers, School Administrators, Educators, Doctors and Nurses in the communities within the 10-mile Emergency Evacuation Zone or the 50-mile peak injury zone around the Indian Point Nuclear Power Facility.

The Report by James Lee Witt Associates commissioned by Governor Pataki, has clearly determined that the existing emergency evacuation plan is inadequate to protect the public health and safety. The four surrounding counties -- Westchester, Rockland, Orange and Putnam -- and the State of New York have refused to certify the evacuation plan because of the broad range of deficiencies identified.

We will do our utmost to make sure that the evacuation plan is executed as best as is humanly possible. However, the large population, the lack of infrastructure, and the limited resources of this region make it hard to foresee a successful evacuation without casualties, regardless of the cause of a significant radiological release.

We are concerned that even our best efforts may not be enough to adequately protect the public health and safety of the citizens of this region.

In conclusion, we request that the Federal Emergency Management Agency ("FEMA") and the Nuclear Regulatory Commission ("NRC") not certify the emergency evacuation plan for Indian Point.

RE: INDIAN POINT RADIOLOGICAL EVACUATION PLAN

We, the undersigned are first responders, including police, fire, EMS and bus drivers, in the communities within the 50 mile peak injury zone of the Indian Point Nuclear Facility.

The current evacuation plan is inadequate and unworkable. Due to the large population of the region, limited resources and escape routes it will be impossible for even the best evacuation plan to adequately protect the public health and safety.

We implore the Federal Emergency Management Agency ("FEMA") and the Nuclear Regulatory Commission ("NRC"), not to certify the emergency evacuation plan for Indian Point, which the four surrounding counties Westchester, Rockland, Orange and Putnam and New York State have not certified.

RE: INDIAN POINT RADIOLOGICAL EVACUATION PLAN

We, the undersigned are First Responders. We include Police Officers, Fire Fighters, EMS Workers, Transportation Workers, School Administrators, Educators, Doctors and Nurses in the communities within the 10-mile Emergency Evacuation Zone or the 50 mile peak injury zone around the Indian Point Nuclear Facility.

The Report by James Lee Witt Associates commissioned by Governor Pataki, has clearly determined that the existing emergency evacuation plan is inadequate to protect the public health and safety. The four surrounding counties, Westchester, Rockland, Orange and Putnam, and the State of New York have refused to certify because of the broad range of deficiencies identified.

The large population, the lack of infrastructure, and the limited resources of this region render it impossible to have a successful evacuation regardless of the cause of a significant radiological release.

We are dedicated to our positions as public safety officers and we are also dedicated family members. We are concerned about the potential conflict of interest this could present in an emergency.

In conclusion, we request that the Federal Emergency Management Agency ("FEMA") and the Nuclear Regulatory Commission ("NRC") do not certify the emergency evacuation plan for Indian Point.

RE: INDIAN POINT RADIOLOGICAL EVACUATION PLAN

We, the undersigned are First Responders. We include Police Officers, Fire Fighters, EMS Workers, Transportation Workers, School Administrators, Educators, Doctors and Nurses in the communities within the 10-mile Emergency Evacuation Zone or the 50-mile peak injury zone around the Indian Point Nuclear Power Facility.

The Report by James Lee Witt Associates commissioned by Governor Pataki, has clearly determined that the existing emergency evacuation plan is inadequate to protect the public health and safety. The four surrounding counties -- Westchester, Rockland, Orange and Putnam -- and the State of New York have refused to certify the evacuation plan because of the broad range of deficiencies identified.

We will do our utmost to make sure that the evacuation plan is executed as best as is humanly possible. However, the large population, the lack of infrastructure, and the limited resources of this region make it hard to foresee a successful evacuation without casualties, regardless of the cause of a significant radiological release.

We are concerned that even our best efforts may not be enough to adequately protect the public health and safety of the citizens of this region.

In conclusion, we request that the Federal Emergency Management Agency ("FEMA") and the Nuclear Regulatory Commission ("NRC") not certify the emergency evacuation plan for Indian Point.
