I agree with Dave Vito's earlier email; we should await their written response.

I believe that our letter spoke well to the issues and that while the PSEG internal statements are less than stellar, the methods of addressing this concern are no more likely to succeed and could potentially add some additional confusion. Their response should be issued within three weeks and we will be in a better position to address potential effects on workers then.

do we think Roy A's letter will have an effect on workers?

pls advise, should we do anything?

Dave Lochbaum contacted the workers and his attached email suggests that the workers want a meeting soon, primarily because their numbers are dropping following the NRC letter. Also, they do not want to be transcribed.
