I am adamantly opposed to any development or expansion of nuclear facilities Anywhere-- but in Mississippi, Louisiana, Alabama, Texas, and Florida especially.

1. The solution to the US energy problem is to reduce consumption and to rely on renewable energy (such as wind and solar energy).

2. The dangers of nuclear facilities (no matter how minimal) are simply unacceptable and unnecessary. The specific building of nuclear facilities in the South--where solar and wind resources are abundant--is particularly ridiculous.

My name is Paulette Swartzfager, 10555 Jefferson Hwy., River Ridge LA 70123, (AND I VOTE!)
