August

1989

We the undersigned petitioners do hereby give notice to all concerned that as local neighbors of Combustion Engineering, Inc. we support their efforts to modernize and expand operations at the Hematite, Missouri plant.

NAMEADDRESS

I, Clarence Cook & Wife having lived [ ]  
for the last 25 yrs. and have  
raised a garden every year since we lived here never  
having any sign of Contamination from Combustion  
Engineering Co. also picked Wild Strawberries & Blackber  
in 1 block of plant for years and the people of Hematite &  
Lake Virginia are getting our water from a well within 1/2  
mile from Combustion Engineering and Mr. Maurice Lucas  
living within a block of said plant has been using  
his well water ever since the plant has been here and  
found no contamination in his water. If Combustion  
Engineering Co. is so contaminating why is it that  
the gardens & Pastures are not affected by the plant?  
Before we close we would like for you to give  
this some thought and answer it about what  
we just said about Combustion Engineering Co.

Sincerely Yours  
Clarence & Ruth Cook
