Jack S. Brenizer, Jr.,
Professor and Chair of Nuclear Engineering
The Pennsylvania State University
138 Reber Building
University Park, PA 16802-1412

Dear Professor Brenizer,

On behalf of the U.S. Nuclear Regulatory Commission (NRC), I want to thank you for allowing us to interview students who expressed interest in employment with the Nuclear Regulatory Commission. I especially want to thank Professor Lawrence Hochreiter, who arranged for us to conduct the interviews, and Donna Gensimore, who scheduled the interviews and provided us with all of the materials to make our interview trip a success.

We plan on inviting a number of students who interviewed with us back to NRC's headquarters in Rockville, Maryland for more in-depth interviews in the coming weeks.

I also appreciated the opportunity to present the seminar on Pressurized-Water Reactor Containment Sump issues. It is an important safety issue, and I hope it provided the audience with a better understanding of the type of technical safety issues the Commission and industry are currently dealing with.

Sincerely,

/RA/

Brian W. Sheron, Associate Director
Project Licensing and Technical Analysis
Office of Nuclear Reactor Regulation
