 Below is the result of your feedback form. It was submitted by

Joel Beres (Joel.E.Beres@ue-corp.com) on Thursday, May 13, 2004 at 11:28:37

comments: The above news release mentioned that the NRC was putting a team together to evaluate the VY licensing and design basis for power uprate.

I am a consulting engineer with very relevant experience. I was a key member of the design basis reconstitution effort at Monticello (VY sister plant). I authored and verified many Design Basis Documents.

In addition, I was instrumental in the power uprate at Monticello. I authored many of the task reports and served as the primary contact with the ACRS. I also co-authored the safety evaluation for the entire project.

I am currently the project manager for an power uprate feasibility study with GE. I am looking into all the design issues for power uprate at this time.

I would like to be considered for the inspection team as a contractor. Can you please tell the appropriate person that I can send me resume to for this effort.

Regards,
 Joel Beres
