TRAINING: IMC 0612 (Power Reactor Inspection Reports) Complete web-based read only training.

REMARKS: IMC 0612 (Power Reactor Inspection Reports) has been revised to clarify definitions for NRC-identified, self-revealing and licensee identified; to provide additional guidance on how to document cross-cutting issues; to improve guidance on LER closure; to update the new report timeliness requirement; and to reflect changes made to the document based on inspector feedback.

IMC 0612 Exh 1 (Standard Reactor Inspection Report Outline) has been revised to correct titles of some inspection procedures and the types of inspections performed in the security area were added.

IMC 0612 Exh 2 (Inspection Report Documentation Matrix) has been revised to provide additional guidance on documentation of inspection findings, potentially greater than green findings, and unresolved items.

IMC 0612 Exh 3 (Sample Reactor Inspection Report) has been revised to improve on the previous example inspection report.

IMC 0612 Exh 4 (Sample Cover Letters) has been revised to provide additional guidance on how to document different types of inspections (AIT, special or supplemental); information stating the non-availability of security inspections to the public was added.

IMC 0612 App A (Acronyms Used in Inspection Manual Chapter 0612) has been revised to add new acronyms.

IMC 0612 App B (Issue Screening) has been revised to clarify the definition of a performance deficiency and a functionality of the control room. Also the auxiliary building attribute was added to the cornerstone and objective section.

IMC 0612 App E (Examples of Minor Issues) has been revised to provide additional examples of cross-cutting aspects and additional examples of minor findings were added.

DISTRIBUTION: Standard
