(1)

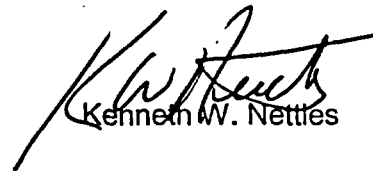

Dear Sir / Madam:

Subject: VIRGIL C. SUMMER NUCLEAR STATION
DOCKET NO. 50/395
OPERATING LICENSE NO. NPF-12
70 FR 51098, "Notice of Opportunity to Comment on Model Safety
Evaluation on Elimination of Typical License Condition Requiring Reporting
of Violations of Section 2.C of Operating License Using the Consolidated
Line Item Improvement Process," August 29, 2005

South Carolina Electric & Gas Company (SCE&G) supports the proposed change described in the subject Federal Register notice. We agree with the staff's technical evaluation that the requirement to report in accordance with the license condition is not needed because the information related to such violations that is important to the NRC's regulatory functions would become available through the inspection program, Licensee Event Reports, licensing actions, public announcements, or some other regulatory mechanism. We fully endorse the comments prepared and submitted on behalf of the commercial nuclear power industry by NEI.

Should you have any questions, please call Mr. Ronald Clary (803-345-4151) at your convenience.

Very truly yours,

Kenneth W. Nettles
