Docket No. 70-36

Dear Mr. Brown:

Enclosed are revised pages to the Fundamental Nuclear Material Control Plan for the Hematite Plant. The FMNC Plan has been revised in accordance with commitments made to NRC Region III and pursuant to discussions with Mr. Ray Jackson of your staff. We consider the changes to be covered by 10CFR70.32(c) in that they generally enhance the effectiveness of our material control system. *no*

Also included are certain changes to eliminate the need for independent measurements for UF₆ receipts, which is made under the provisions of 10 CFR70.34 as specified in your letter dated December 20, 1984. A check for \$150.00 is enclosed as the required fee. Additional pages will require revision for this change.

Substantive changes and new text are denoted by an asterisk in the margin. Please advise if you have any questions.

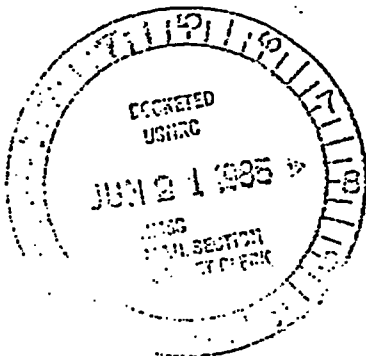

Very truly yours,

COMBUSTION ENGINEERING, INC.
