Subject: EDO highlight VY eng. team

This morning,

it was requested that an EDO highlight be prepared regarding the Eng team at VY this week.

Attached is a recommended highlight.

Please review and comment as appropriate. I will then forward to DRP staff for inclusion as a highlight for tomorrow.

thanx

frank a.

Week Ending August 14, 2004

Engineering Design Inspection at Vermont Yankee

On August 9, 2004, a team of eight inspectors from the Nuclear Regulatory Commission, including three contractors, began a pilot engineering design inspection at the Vermont Yankee nuclear power plant in Vernon, Vermont. The team is implementing a temporary instruction inspection procedure as part of an effort to enhance the Reactor Oversight Process design inspections. This inspection will also provide information relevant to reviewing Entergy Nuclear's application to increase the plant's power output by 20 percent. The Governor of Vermont and Congressional delegations have shown significant interest. Region I is interacting with Vermont State Representatives to set up periodic briefings for interested parties.
