**Subject:** Phone call summary concerning intent of NRC's Aug 15-17 onsite ISA Summary review

Brian,

Concerning the NRC's subject review, on August 11, 2005, I had asked Kelly Coriell of USEC to:

1. have all related material available
2. have copies of updated ISA Summary available
3. have a copy of the process system schematics and drawings available (these were part of USEC's 4/15 application revision submittal)

I requested her to setup an introduction meeting on Monday 8/15 in the afternoon followed by a tour of the following areas:

1. sampling and transfer areas (Portsmouth Gaseous Diffusion Plant and GCEP)
2. Lead Cascade area
3. storage yards, and UF6 cylinder transporters and transportation routes onsite

I indicated that our vertical slice reviews starting on Tuesday 8/16 would include the BT process accidents including BT 3-1a, BT 3-3, BT-3-9, and BT 3-4, BT3-4a, BT1-2. I said that we would also be reviewing process accidents PB 2-2, PB 1-6, and WS 3-11.

Yawar
