Subject: Request - "Semi-Annual Ground Water Monitoring for Lucky Mc Mine"

Tom:

We reviewed your report entitled, "Semi-Annual Ground Water Monitoring for Lucky Mc Mine," dated August 19, 2005.

You stated in the report that Ra-226+-228 exceeded the site standard (ACL) in June 2005. You questioned the validity of the elevated value, and stated that you would reanalyze the sample and collect another sample in August 2005.

We request that you send us the results as soon as they're available.
