Notes on the Sweet Hall Marsh Water Quality Monitoring Site

N. H. Wooding
8/01/2005

This site is the uppermost of four monitoring sites established along the York River as part of the Chesapeake Bay National Estuarine Research Reserve in Virginia (CBNERRVA) program. The others are located at Taskinas Creek, Catlett Islands, and Goodwin Islands. I have not looked into the monitoring programs at the other sites but the one at Sweet Hall Marsh has been operated with ENDECO/YSI remote sensing apparatus since 1999. Data for the years 2002-2004 are available on the website

<http://cdmo.baruch.sc.edu>

The SHM site is located at 37°34'16.94", 76°53'2.78" or 37.5714, 76.89841. This is approximately 35km upstream of the mouth of the Pamunkey and appears on the New Kent quad. The logger is housed in a permanent structure beside the Pamunkey on the downstream side of the marsh so it appears to be measuring river water conditions. An aerial view of the area dated 9/1/2004 shows

The indicated site of the logger is an approximation that I did using Terraserver. Note that this image was done using a screen-capture and should only have limited distribution. The image is for sale from Terraserver.

The following portion of the New Kent quad shows the monitoring location:

The VIMS website which describes the installation does not state where the sonde is placed in the river.

Note the large channel that cuts across the marsh just upstream of the monitoring site. This channel appears to drain the marsh so I assume that it affects the water that reaches the logger.

Temperatures Recorded at NAR1, NAR5, and Sweet Hall Marsh

# -----WARNING-----
# The data you have obtained from this automated
# U.S. Geological Survey database have not received
# Director's approval and as such are provisional
# and subject to revision. The data are released
# on the condition that neither the USGS nor the
# United States Government may be held liable for
# any damages resulting from its use.
#
# Additional information can be obtained from the USGS at
# http://waterdata.usgs.gov/va/nwis/help/?provisional
#
# retrieved: 2005-08-12 15:10:27 EDT
#
# This file consists of tab-separated columns of data for a list of sites.
# Each site is separated by a header section of comments and a new column
# header and format header section.
#
# The column headers include the following fields
#
# column          column definition
# -----
# agency_cd       Agency collection or maintaining the site
# site_no         USGS site identification number
# datetime        date and time in ISO format (YYYY-mm-dd HH:MM)
#
# The remaining fields vary for each site. The field names
# use the following form '##_#####' where the first two numbers
# uniquely define sensor (the 'data descriptor') and the
# used to collect the data used to collect the data
# and the 5 number sequence is the 'parameter_cd'
# that defines the type of data shown in the column.
#
#
# Data for the following stations is contained in this file
# -----
# USGS 01671020 NORTH ANNA RIVER AT HART CORNER NEAR DOSWELL, VA
#
#
#
#
# List of available data for this site. Lines preceeded by
# an asterix '*' are included in the data file.
#
# DD parameter - Description
# --
# *01 00060 - Discharge, cubic feet per second
# 04 00065 - Gage height, feet
#
# agency_cd    site_no    datetime    01_00060
# 5s          15s        16s         14s
