

# TELEPHONE CONVERSATION

---

**To:** Mr. Carlos Acero  
**From:** Rachel Browder /RA/  
**Date:** October 13, 2005  
**Subject:** Follow-up to Mr. Acero's phone call from today, 10/13/05

Docket: 030-35295  
License: 04-27654-01  
Control: 470663

I contacted Mr. Acero, in follow-up to his voice message from earlier today, at which time he stated that he had received License Amendment No. 02, Control No. 470663, which requested clarification on name change for the company. Mr Acero stated that he had forwarded the request to the corporate office of Testing Engineers-San Diego. He indicated that there was a different letterhead and logo - however, the company which held the NRC license was still San Diego Testing Engineers, dba Testing Engineers - San Diego, Inc.

Mr. Acero indicated that the NRC should receive a response back from the Corporate Office; however, it may not be within the 15 day request for response. I indicated that it was all right - we'll just docket the response when we receive it. It was not as urgent, since we understand there was apparently not a change of control, just a different letterhead. However, we will make that determination when a response is received from their corporate office.
