<p>Name of Licensee: Unitech Services Group, Royersford, Pa.</p> <p>Name of Participant(s): Glenn Roberts, Unitech Jim Schmidt, Region I</p> <p>Telephone No. 610-948-9700</p> <p>Subject: Request for Additional Information, Control No.137582 (NOTE: This will be used as the Documents Title in ADAMS)</p>		
<p>Summary:</p> <p>The nature of the licensing amendment request submitted by the licensee was discussed and it was determined that the licensee is actually looking to establish an liquid effluent release license condition that is dose-based rather than based on some fraction of the liquid concentration limits set in 10 CFR 20 Appendix B as is presently the case. The dose-based approach is allowed by 10 CFR 20.1302 and is presently the method used by the licensee to support their PADEP NPDES permit for the liquid releases.</p> <p>The licensee stated that they will submit additional information that requests an annual dose limit, establishes the ALARA basis for the limit, and states how they intend to demonstrate that this limit is being met (frequency of reports, models used, etc.).</p>
