Subject: Phone conversation with Dave Couser of USEC

Brian,

A few minutes ago I informed Dave Couser of USEC that as identified by Norma Garcia, Section 1.1.5.5.5 of the application (Page 1-19) refers to ASTM Standards concerning liquid UF₆ sampling. However, no particular ASTM standard is identified. I asked Dave to consider including ASTM C 1052 "Standard Practice for Bulk Sampling of Liquid Uranium Hexafluoride" in Section 1.4 of the application. I also asked Dave to consider including in Section 1.4 of the application, ASTM C 787 "Standard Specification for Uranium Hexafluoride for Enrichment" and ASTM C 996 "Standard Specification for Uranium Hexafluoride Enriched to Less Than 5 % ²³⁵U" as these are identified in Footnote "a" of Table 1.2-2 (Page 1-63) of the application. Dave indicated that USEC would promptly address these matters.

I also asked Dave to identify the cylinder types for which the limiting ullages apply and to reconsider making the limiting ullages similar to the ones applicable to the GDPs.

Yawar
